### Maodou fulfillment system

A multi-platform system for managing the process of delivering cars to customers efficiently.

# About the system

We design and built our fulfillment system for

- managing business operation of supply chain
- converting information from offline activities into digital format.

## The App

The app is designed for multiple roles for handling daily activities anywhere.

#### Role

**Stakeholder** - Those high level managers who cares about fulfillment performance.

**Manager** - Those who manage the teams of operation.

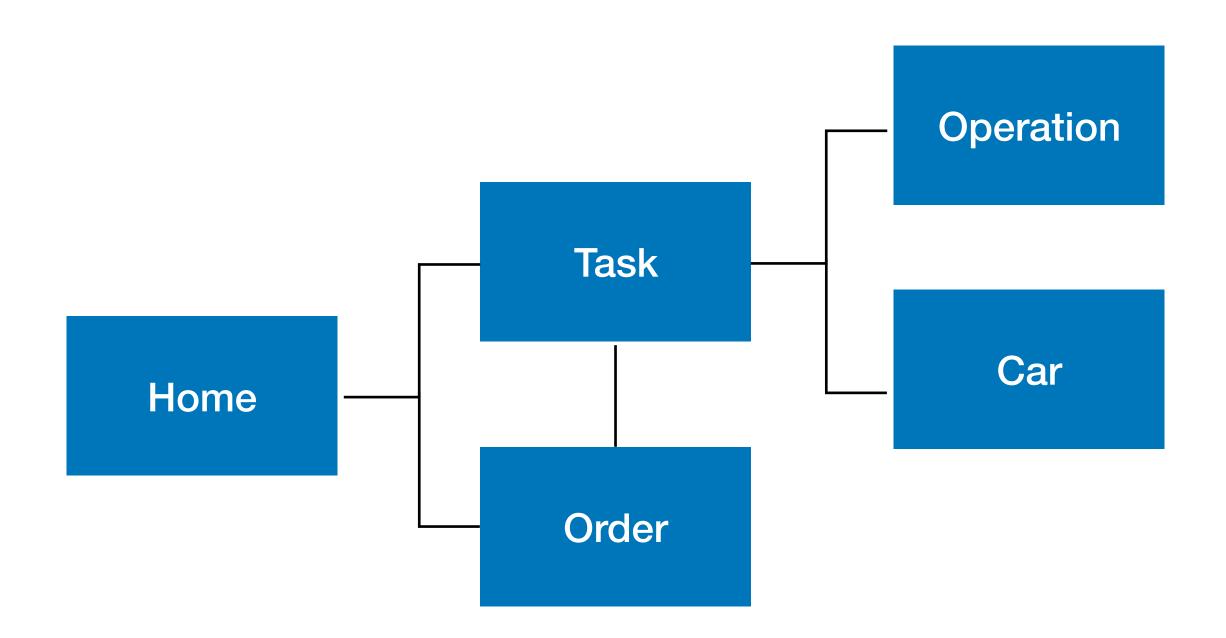

Worker - Those who handle the tasks and issues.

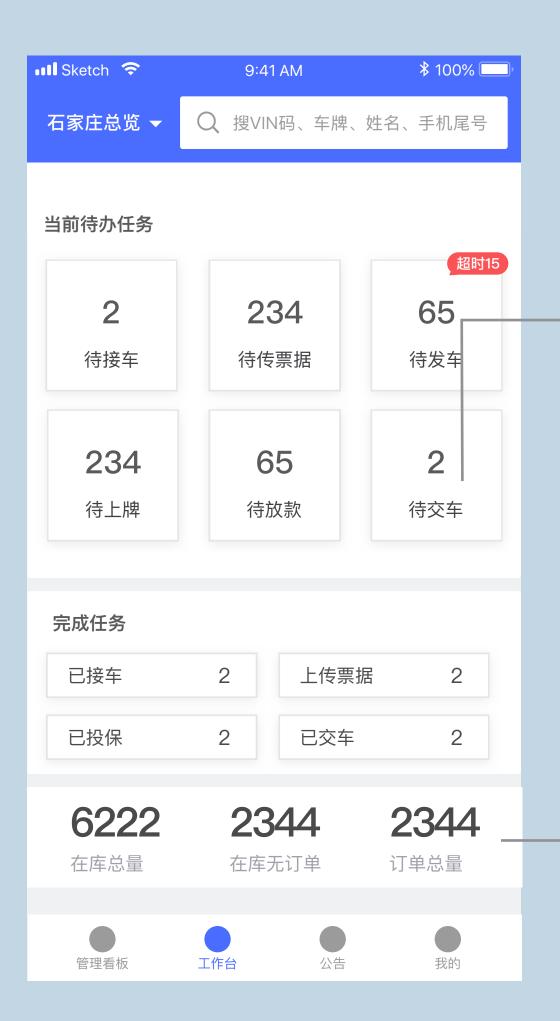

### The core information architecture of the App.

The system is centered with tasks. Each of the task is associated with operations, the car on order and the order.

#### task

#### order

#### car

#### operation

#### **Contextual task list**

For different activities in the process, we design task lists which provide information and filters related to working context.

### **Business operation**

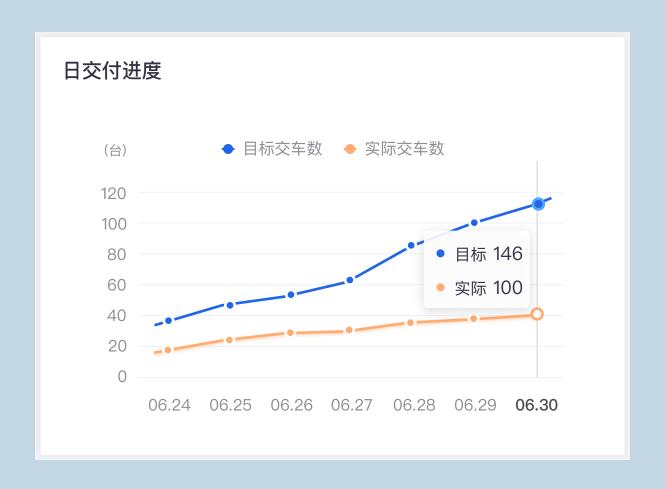

Users can update operational data on the app while working.

### Information visualization

We provide important data for managers and stakeholders.

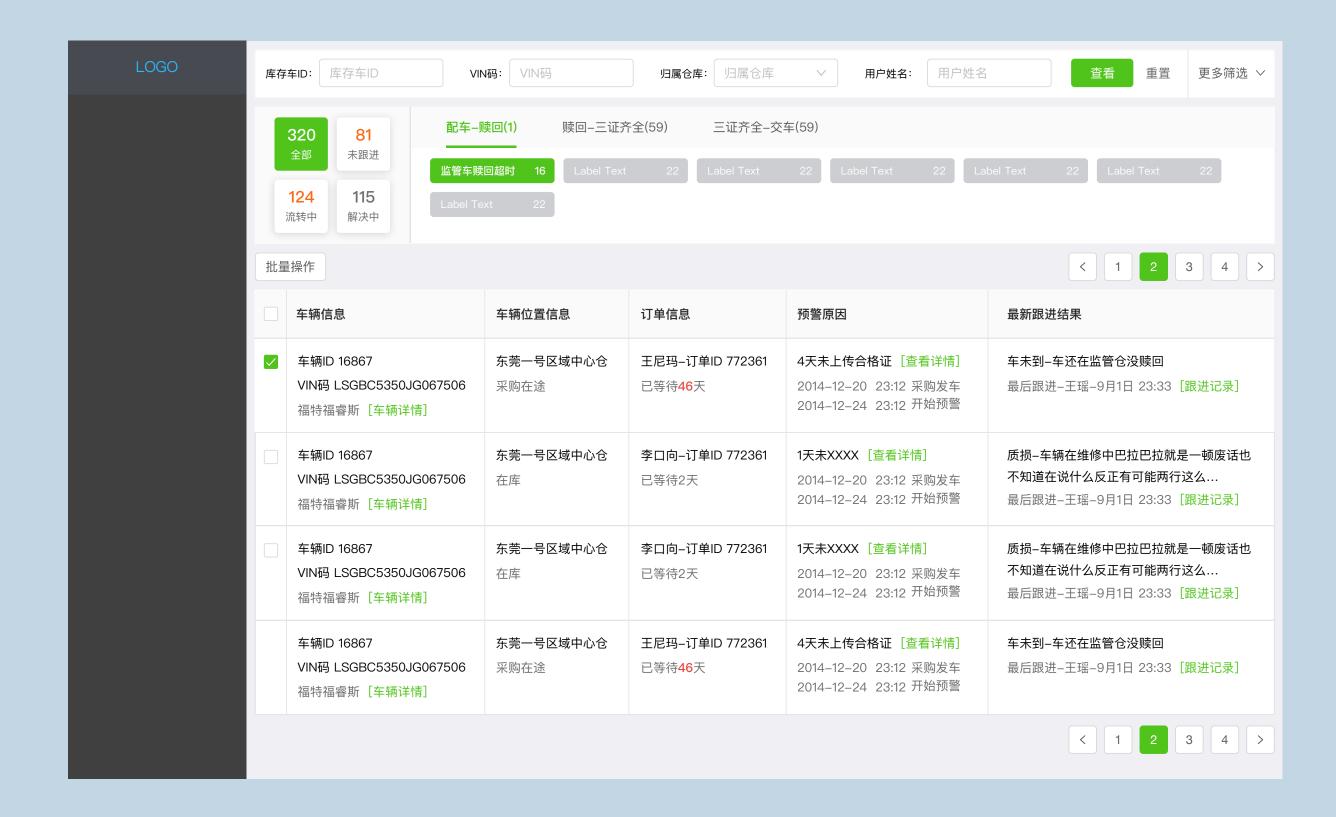

地区交付进度				
区域		实际交车	目标交车	差值
合计		1633	1623	10
北区	^	1633	1623	2
华南		163	163	22
华中		163	163	163
东北		163	163	263
南区	<b>~</b>	1633	1623	-103

# The web system

We design and built webs for monitoring operational data and management activities.

# Design process

Requirement analysis by user stories and use cases

As	he/she wants	he/she intents to	
仓库车辆管理员	知道a仓库有多少车要运走	输入仓库的名称 /输入仓库的城市	
仓库票据管理员	合格证,发票和车都在特定仓库 的vin码/车	输入仓库的名称	
总部	某个仓库有多少车和合格证发票都在当前仓库????	输入当前仓库,合格证仓库,发票 仓库,都为一个仓库	
	a 车现在处于什么状态	输入 a 车车架号/输入订单号	

#### 验车

- 1. 填写车型代码
- 2. 勾选关键配置
- 3. 标注质损/发票/合格证 状态
- 4. 标注环保清单/一致性证书有无
- 5. 标注是否验车是否通过

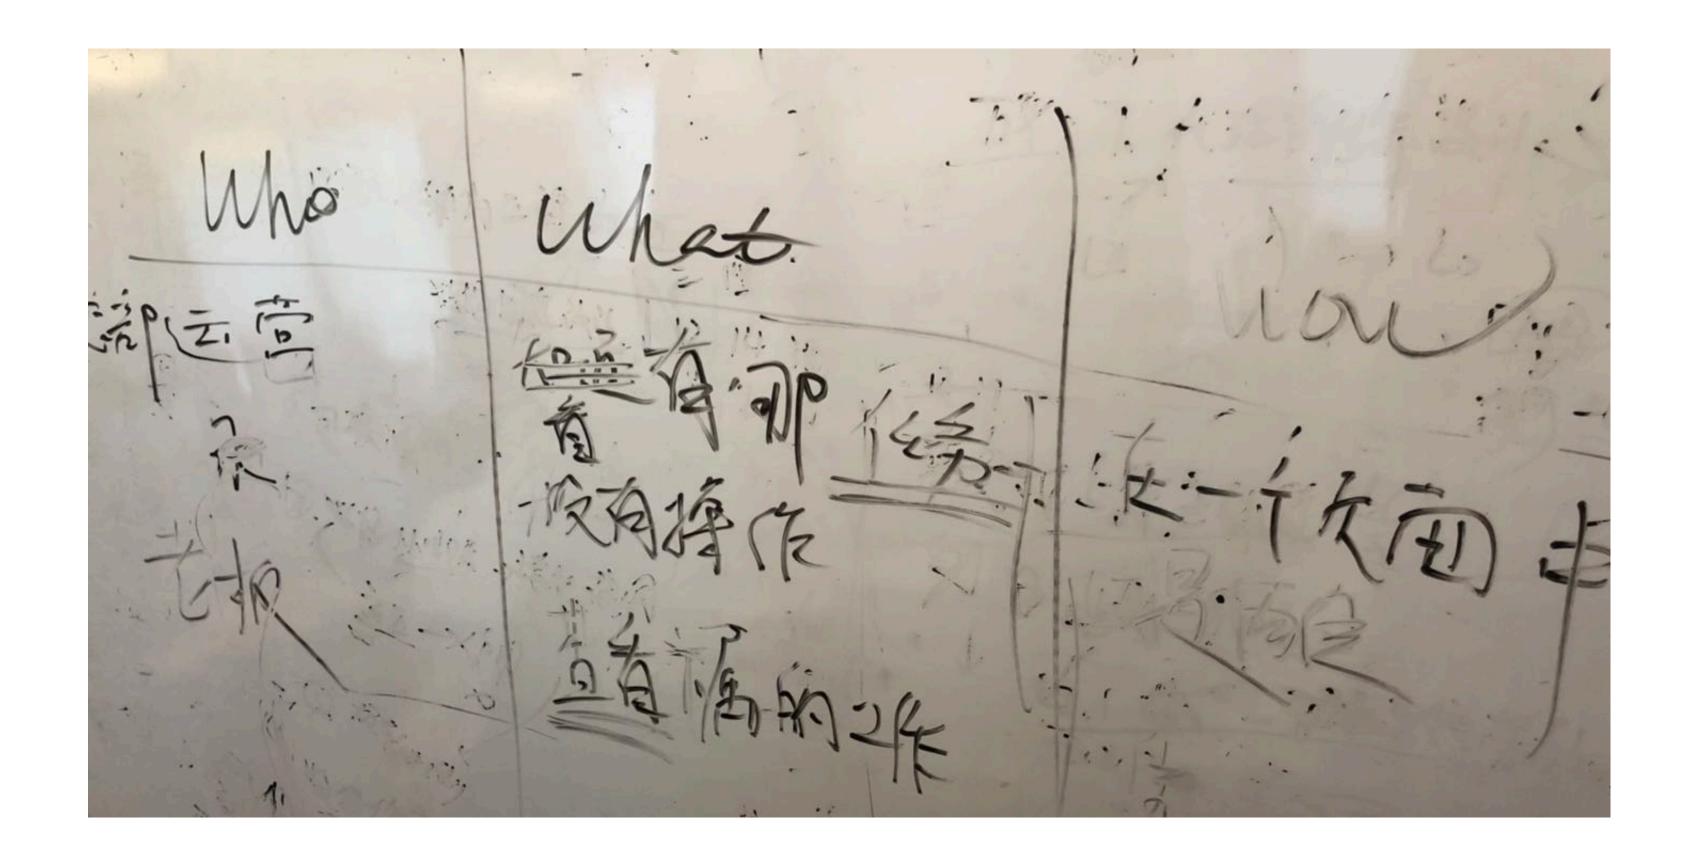

#### 5A 通过

- 1. 录入相关资料
- 2. 提交表单

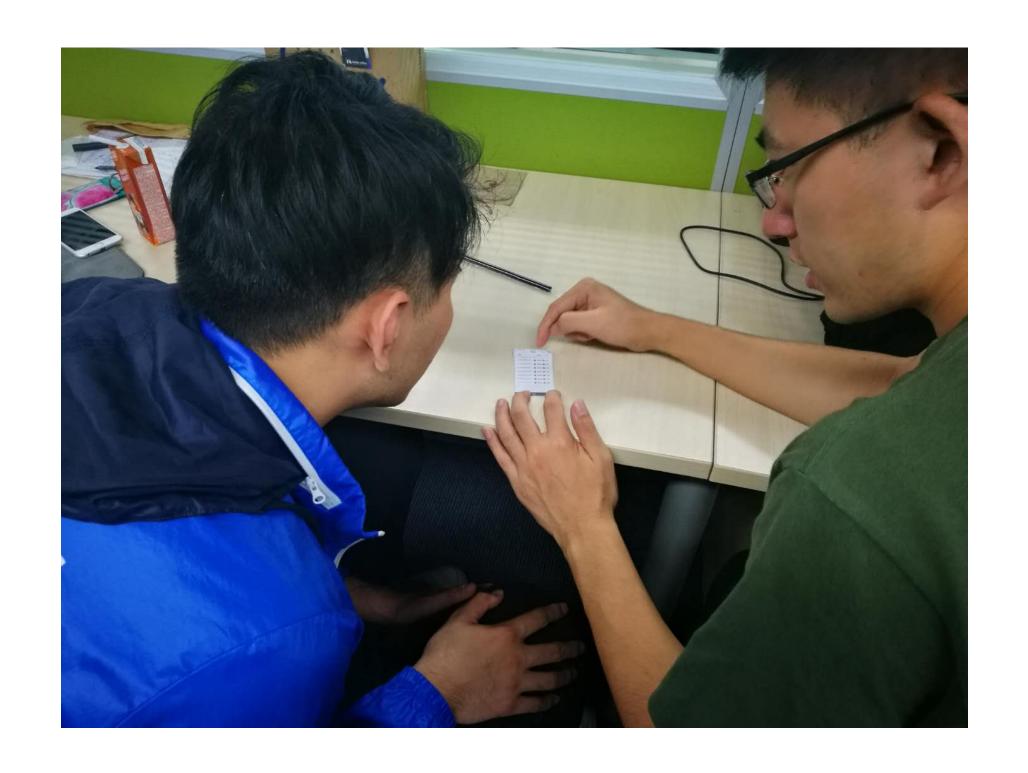

#### 5 B不通过

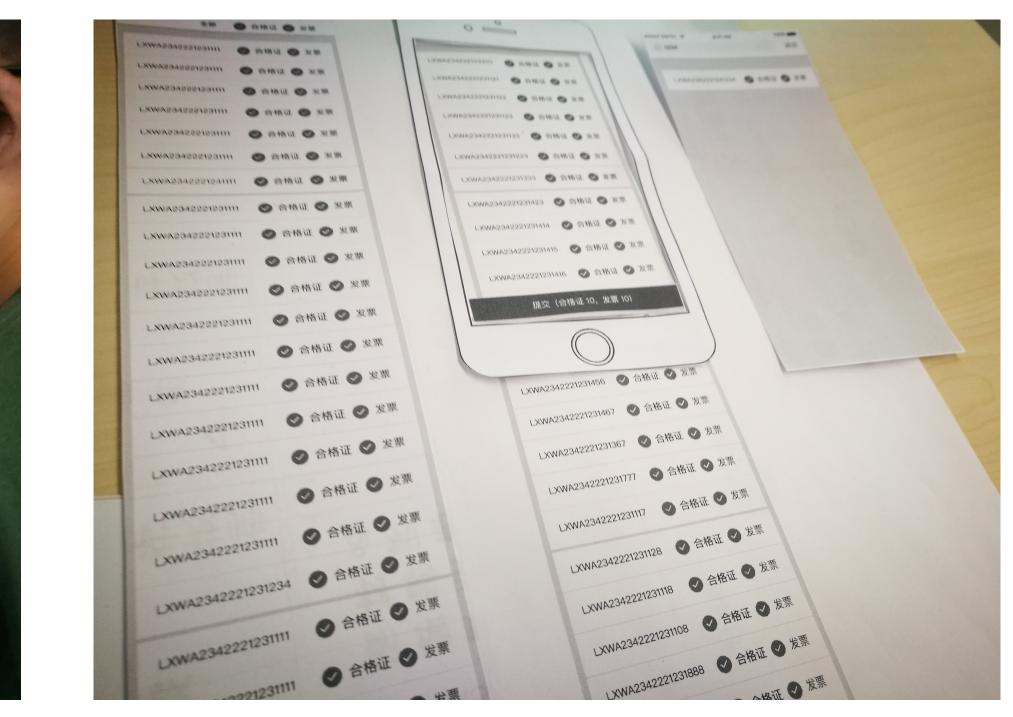

- 1. 填写相关信息
- 2. 提交表单

Communicate with stakeholders for aligning the product goals.

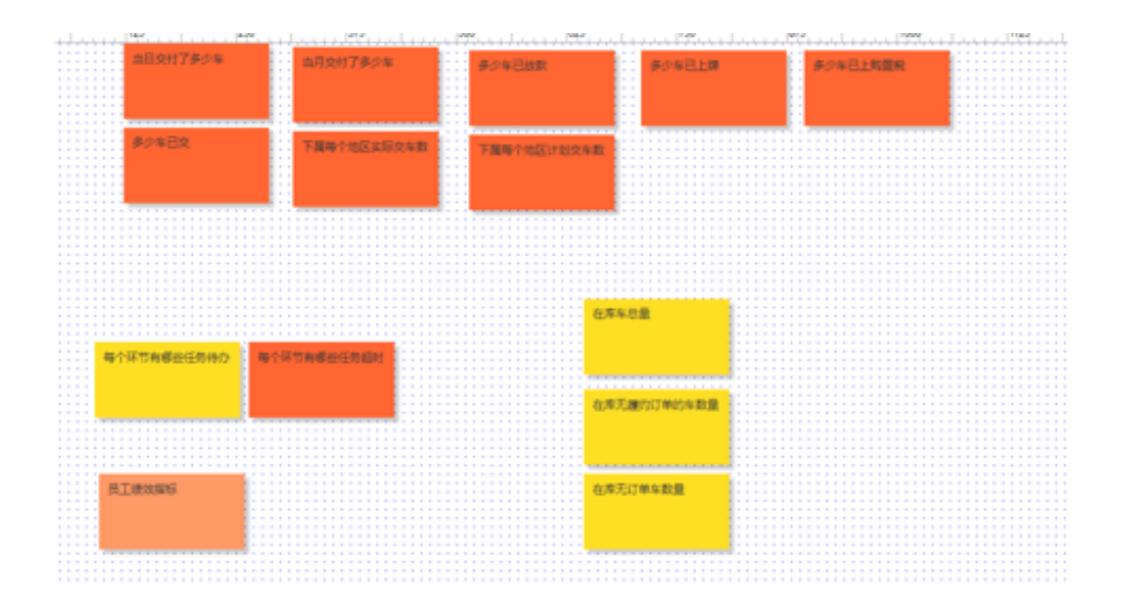

User testing with prototypes to validate the design before development.

Card sorting for exploring users information requirements.

### Information design of fulfillment process
